

THE SHORT DESCRIPTION OF THE SOCIETY ACTIVITIES

The Nephrological Service of Uzbekistan was organized in 2018 pursuant to the Decree of the President of the Republic of Uzbekistan No. 3846 dated 07/12/2018 "On measures to improve the efficiency of the provision of nephrological and hemodialysis care to the population of the Republic of Uzbekistan".

"Nephrological Service of Uzbekistan" is a medical public republican organization that carries out targeted work to bring together nephrologists to coordinate and facilitate the development and implementation of modern methods of conservative and renal replacement therapy in the health care system of Uzbekistan.

To this end, the Company takes part in the organization and conduct of nephrological conferences, including the organization of events in the regions of Uzbekistan. In the near future it is planned to create a regular journal "Nephrology". One of the important directions of the society's work is the creation of a nationwide registry of patients with CKD.

Also, the NSU helps to solve the whole complex of biological, technical, technological and medical problems associated with nephrology, extracorporeal detoxification, kidney transplantation and rehabilitation of patients in the post-transplantation period, coordinating all hemodialysis departments of the republic, preparing scientific and medical personnel.

In general, the company is coordinating with the Republican Specialized Scientific and Practical Medical Center for Nephrology and Kidney Transplantation and provides training and professional development for nephrologists, transplantologists, specialists in extracorporeal detoxification methods (doctors, technicians, and paramedical personnel). The Department of Nephrology, Extracorporeal Detoxification and Transplantology of the Tashkent Institute for Advanced Medical Studies, and the Department of Pediatric Nephrology of the Tashkent Pediatric Medical Institute are located at the Center.

In the very first year of its creation, in honor of World Kidney Day, the society organized an international scientific and practical conference "Actual Nephrology Issues" on March 14, 2018 in Tashkent, where a variety of issues of nephrology, dialysis and transplantation of adult and pediatric nephrology were discussed.

Since the company was organized only a year ago, in the future many scientific, educational and social projects are planned, as well as cooperation by societies of foreign countries and regions.
