Discover the new ERA Awards 2022

In view of giving even more support and recognition to excellence in nephrology in particular to the younger generation, the ERA Council has decided to grant three ERA Awards to young members. Therefore, the total number of ERA Awards available for 2022 will be:

1. Outstanding clinical contributions to nephrology and/or dialysis and/or transplantation (no age limitation)
2. Outstanding basic science contributions to nephrology and/or dialysis and/or transplantation (no age limitation)
3. Research excellence in nephrology (clinical or basic science) (age: 41-60)
4. Awards for young investigators (age: max 40):
   - Rosanna Gusmano Award (for young investigators in basic science)
   - Stanley Shaldon Award (for young investigators in translational science)
   - Eberhard Ritz Award (for young investigators in clinical science)

Reducing bureaucracy in clinical trials: Coalition Recommendations

In 2020, a broad cross-disciplinary coalition of medical societies and patient advocates issued the joint statement ‘Reducing bureaucracy in clinical trials: now is the time’.

The statement calls for urgent action to make clinical trials less bureaucratic and more patient-centred, efficient and cheaper. At stake are the quality of clinical trials, access to innovative treatments and, crucially, patient safety.

ERA is a key part of the Coalition that has written the recommendations and that calls on regulators, policymakers, sponsors, ethics committees and other stakeholders to collaborate to ensure that regulatory guidelines, safety reporting requirements and informed consent procedures do not harm what they are meant to protect: clinical trial quality and patient safety.
