New NDT Video by IWG

On behalf of the ERA Immunonephrology Working Group, **Hans-Joachim Anders** presents the NDT publication: "[The management of lupus nephritis as proposed by EULAR/ERA 2019 versus KDIGO 2021](#)". The Immunology Working Group of the ERA reviewed and compared both the EULAR/ERA and KDIGO guidelines on the management of lupus nephritis. Although largely consistent, this article identifies differences and clarifies discrepancies.

New in CKJ

The summary article of the **ERA Registry Annual Report 2019** is now online, presenting the latest data on the epidemiology of renal replacement therapy for end-stage renal disease in 2019 in 34 European countries and countries bordering the Mediterranean Sea. In addition, this article contains age comparisons showing substantial differences in the distribution of primary renal disease, treatment modality, kidney donor type, and in the survival probabilities for the different age groups.

Networking

How your good intentions for 2022 can succeed!

Even if good intentions are sometimes difficult to achieve, Christoph Wanner, ERA President, considers them immensely important: "Good intentions can be an effective incentive for positive behavioural changes that significantly improve our quality of life in the long run. Above all, our heart and kidneys will benefit from a healthier lifestyle. [...]"
