

CME Course, Iasi 5th-6th September 2014

5th September 2014

15.00 Welcome, introduction (Gerard London, EURECA-m Chair, and Adrian Covic, President of the organizing committee)

15.15-16.30

Measuring renal function and integrating cardiovascular risk factors in CKD: a reappraisal

Chairs:

- Do we need better renal function indicators of the health risks of CKD?
Raymond Vanholder, Ghent
- Pulmonary Congestion in CKD: an integrator of LV disorders and volume overload
Carmine Zoccali, Reggio Cal
- New methods to evaluate cardiac and fluid status in dialysis **Adrian Covic, Iasi**
- Cardiac evaluation of transplant candidates-what test for what person? **Alan Jardine, Glasgow**

Coffee Break

17.30-18.00

Inflammation and Nutrition in CKD: always at center stage

Chairs:

- Inflammasome and cardio-renal risk in CKD [Alberto Ortiz, Madrid](#)
- Nutrition and cardiovascular disease in CKD: any room for intervention? [Denis Fouque, Lyon](#)
- Aldosterone antagonism – better than ACEI? [Patrick Rossignol, Nancy](#)

6th September 2014

9.00-10.30

Clinical Epidemiology of hypertension and hypertension-related risk in CKD

Chairs:

- Stroke risk : a crucial, overlooked problem in CKD [Adrian Covic , Iasi](#)
- Short term and long term BP variability in CKD [Francesca Mallamaci, Reggio Cal](#)
- Novel pharmacological treatments of hypertension [Andrzej Wiecek, Katowice](#)
- Update on renal ablation for hypertension ([TBD](#))

Coffee Break

11.00-13.00

CKD-MBD in Cardiovascular and Renal Medicine: Two steps forward and one back?

Chairs:

- The FGF23 story: more complex than expected? [Danilo Fliser, Homburg/Saar](#)
- Re-appraisal about the role of PTH in Cardiovascular Disease and in CKD. [Gerard London, Paris](#)
Pro and Con debate:
- Phosphate as a cardiovascular risk factor: is the evidence solid enough?(Pro) [Ziad Massy, Paris](#)
- Any evidence linking CKD-MBD to hard outcomes? (Con) [David Goldsmith. London](#)
