## **The Fifth International Hemodialysis Course Urology & Nephrology Center, Mansoura University (September 24<sup>th</sup> - September 28<sup>th</sup>, 2012)**

It is our pleasure to welcome all of you for your attendance the fourth international hemodialysis course that is held at Urology and Nephrology Center, Mansoura University, Mansoura, Egypt in collaboration with Egyptian Society of Nephrology and Renal Transplantation, Arab Society of Nephrology and Renal Transplantation and European Renal Association.

The primary aim of this course is to help the interested colleagues to provide competent, safe and updated standard of care for hemodialysis patients. We will concentrate on the clinical practice training as well as the applicable knowledge because we believe that science has been seriously retarded by the study of what is not worth knowing, and what is not knowable. Special workshops are added this year to cover the practical aspects of Nutritional therapies. Besides workshops and live case discussion and meet the expert workshops, We try to face the challenge to cover both the practical approaches and the sophisticated arenas.

We believe that the only guarantee for our success is your careful attention and interaction.

On behalf of organizing committee, I'd like to thank our guest speakers and I hope to have a fruitful course and pleasant stay with us in Mansoura.
