Dear Participant!

On behalf of the Organizing Committee we welcome You in 6th Renal Eastern Europe Nephrology Academy REENA 2012 and incorporated CME course from ERA-EDTA which will be held at 16th of March. This year our event will take place in Kiev at National Medical Academy of Postgraduate Education in cooperation with Ukrainian Internist society and will be dedicated to WKD 2012.

REENA is an annual course organized for nephrologists and specialists of general practice from Ukraine, from CIS and Eastern Europe countries. The main aim of REENA is to improve knowledge on kidney and satellite diseases, dialysis and transplantation in an area that is most needed by practical nephrologists in present time. Traditionally educative lectures on REENA are presented by popular and well-known speakers from ERA-EDTA and ISN and opinion leaders from European countries.

This year each block consists from 3 parts: lecture, interactive discussion and expert session with whole duration 1,5 hour.

Hope to be useful to you
