ERA-EDTA Registry Committee

JD Briggs, chairman
G Colasanti, Italy
T Feest, United Kingdom
C Grönhagen-Riska, Finland
AJ van der Heijden, The Netherlands
HJ Schober-Halstenberg, Germany
K Simpson, Scotland
B Stengel, France
D Tsakiris, Greece
K Verrier-Jones, United Kingdom

Registry Office Staff

S Bos, database manager - website developer
R Cornet, senior medical informatician
FW Dekker, senior epidemiologist
PCW van Dijk, medical informatician
EF Güggenheim - van der Hout, secretary
KJ Jager, managing director - epidemiologist
VS Stel, epidemiologist

Acknowledgements

The ERA-EDTA Registry would like to thank the patients and staff of all the dialysis and transplant units who have contributed data via their national and regional renal registries.

In addition, we would like to thank the following persons for their contribution to the work of the ERA-EDTA Registry.

Registry

For contribution to Section A

Austria	R Kramar and HK Stummvoll
Belgium - Dutch-speaking	H Augustijn and J Donck
Belgium - French-speaking	F Collart
Denmark	H Løkkegaard
Finland	C Grönhagen-Riska and P Finne
Greece	GA Ioannidis
Iceland	P Ásmundsson
Norway	T Leivestad
Spain - Basque country	Á Magaz, J Aranzabal and I Lampreabe
Spain - Catalonia	M Clèries and E Vela
Spain - Valencia	O Zurriaga and MJ García Blasco
Sweden	S Schön
The Netherlands	F de Charro
United Kingdom - England/Wales	D Ansell and T Feest
United Kingdom - Scotland	K Simpson

For contribution to Section B

Bosnia - Herzegovina	E Mešić and H Resić
Croatia	S Čala
Czech Republic	J Lachmanova and F Lopot
Estonia	M Ots, M Luman and K Lilienthal
Germany	HJ Schober-Halstenberg and K Haas
Russia	N Tomilina and B Bikbov
Serbia and Montenegro	L Djukanovic and M Radovic
Tunisia	N Cherni and H Trimech
Turkey	K Serdengeçti and G Suleymanlar

The ERA-EDTA Registry is funded by the ERA-EDTA. The following companies have committed funds in the form of unrestricted educational grants to assist the ERA-EDTA in the financial support of the Registry: Amgen, Baxter, Fresenius Medical Care, Gambro, Hoffmann-La Roche, Hospal, Ortho-Biotech and Shire.

A5 SURVIVAL PROBABILITY (residents only)**Patient Survival on Renal Replacement Therapy (RRT)****Table A.5.1 - 44**

90-day, one-, two- and five-year survival probabilities (cohort 1992-1996): Incident RRT patients, unadjusted
from day 1 to 90 days, one, two and five years, by age, gender and primary diagnosis

Table A.5.2 - 44

90-day, one-, two- and five-year survival probabilities (cohort 1992-1996): Incident RRT patients, adjusted
from day 1 to 90 days, one, two and five years, adjusted for age, gender and primary diagnosis

Table A.5.3 - 45

One-, two- and five-year survival probabilities (cohort 1992-1996): Incident RRT patients, unadjusted
from day 91 to one, two and five years + 90 days, by age, gender and primary diagnosis

Table A.5.4 - 45

One-, two- and five-year survival probabilities (cohort 1992-1996): Incident RRT patients, adjusted
from day 91 to one, two and five years + 90 days, adjusted for age, gender and primary diagnosis

Table A.5.5 - 46

90-day, one- and two-year survival probabilities (cohort 1995-1999): Incident RRT patients, unadjusted
from day 1 to 90 days, one and two years, by age, gender and primary diagnosis

Table A.5.6 - 46

90-day, one- and two-year survival probabilities (cohort 1995-1999): Incident RRT patients, adjusted
from day 1 to 90 days, one and two years, adjusted for age, gender and primary diagnosis

Table A.5.7 - 47

One- and two-year survival probabilities (cohort 1995-1999): Incident RRT patients, unadjusted
from day 91 to one and two years + 90 days, by age, gender and primary diagnosis

Table A.5.8 - 47

One- and two-year survival probabilities (cohort 1995-1999): Incident RRT patients, adjusted
from day 91 to one and two years + 90 days, adjusted for age, gender and primary diagnosis

Patient Survival on Dialysis**Table A.5.9 - 48**

90-day, one-, two- and five-year survival probabilities (cohort 1992-1996): Incident dialysis patients, unadjusted
from day 1 to 90 days, one, two and five years, by age, gender and primary diagnosis

Table A.5.10 - 48

90-day, one-, two- and five-year survival probabilities (cohort 1992-1996): Incident dialysis patients, adjusted
from day 1 to 90 days, one, two and five years, adjusted for age, gender and primary diagnosis

Table A.5.11 - 49

One-, two- and five-year survival probabilities (cohort 1992-1996): Incident dialysis patients, unadjusted
from day 91 to one, two and five years + 90 days, by age, gender and primary diagnosis

Table A.5.12 - 49

One-, two- and five-year survival probabilities (cohort 1992-1996): Incident dialysis patients, adjusted
from day 91 to one, two and five years + 90 days, adjusted for age, gender and primary diagnosis

Table A.5.13 - 50

90-day, one- and two-year survival probabilities (cohort 1995-1999): Incident dialysis patients, unadjusted
from day 1 to 90 days, one and two years, by age, gender and primary diagnosis

Table A.5.14 - 50

90-day, one- and two-year survival probabilities (cohort 1995-1999): Incident dialysis patients, adjusted from day 1 to 90 days, one and two years, adjusted for age, gender and primary diagnosis

Table A.5.15 - 51

One- and two-year survival probabilities (cohort 1995-1999): Incident dialysis patients, unadjusted from day 91 to one and two years + 90 days, by age, gender and primary diagnosis

Table A.5.16 - 51

One- and two-year survival probabilities (cohort 1995-1999): Incident dialysis patients, adjusted from day 91 to one and two years + 90 days, adjusted for age, gender and primary diagnosis

Patient Survival after First Transplant (cadaver donor)**Table A.5.17 - 52**

One-, two- and five-year survival probabilities (cohort 1992-1996): First transplant patients (cadaver donor), unadjusted from day of transplant to one, two and five years, by age, gender and primary diagnosis

Table A.5.18 - 52

One-, two- and five-year survival probabilities (cohort 1992-1996): First transplant patients (cadaver donor), adjusted from day of transplant to one, two and five years, adjusted for age, gender and primary diagnosis

Table A.5.19 - 53

One- and two-year survival probabilities (cohort 1995-1999): First transplant patients (cadaver donor), unadjusted from day of transplant to one and two years, by age, gender and primary diagnosis

Table A.5.20 - 53

One- and two-year survival probabilities (cohort 1995-1999): First transplant patients (cadaver donor), adjusted from day of transplant to one and two years, adjusted for age, gender and primary diagnosis

Patient Survival after First Transplant (living donor)**Table A.5.21 - 54**

One-, two- and five-year survival probabilities (cohort 1992-1996): First transplant patients (living donor), unadjusted from day of transplant to one, two and five years, by age, gender and primary diagnosis

Table A.5.22 - 54

One-, two- and five-year survival probabilities (cohort 1992-1996): First transplant patients (living donor), adjusted from day of transplant to one, two and five years, adjusted for age, gender and primary diagnosis

Table A.5.23 - 55

One- and two-year survival probabilities (cohort 1995-1999): First transplant patients (living donor), unadjusted from day of transplant to one and two years, by age, gender and primary diagnosis

Table A.5.24 - 55

One- and two-year survival probabilities (cohort 1995-1999): First transplant patients (living donor), adjusted from day of transplant to one and two years, adjusted for age, gender and primary diagnosis

Graft Survival after First transplant (cadaver donor)**Table A.5.25 - 56**

One-, two- and five-year survival probabilities (cohort 1992-1996): First graft (cadaver donor), unadjusted from day of transplant to one, two and five years, by age, gender and primary diagnosis

Table A.5.26 - 56

One-, two- and five-year survival probabilities (cohort 1992-1996): First graft (cadaver donor), adjusted from day of transplant to one, two and five years, adjusted for age, gender and primary diagnosis

Table A.5.27 - 57

One- and two-year survival probabilities (cohort 1995-1999): First graft (cadaver donor), unadjusted from day of transplant to one and two years, by age, gender and primary diagnosis

Table A.5.28 - 57

One- and two-year survival probabilities (cohort 1995-1999): First graft (cadaver donor), adjusted from day of transplant to one and two years, adjusted for age, gender and primary diagnosis

Graft Survival after First Transplant (living donor)

Table A.5.29 - 58

One-, two- and five-year survival probabilities (cohort 1992-1996): First graft (living donor), unadjusted
from day of transplant to one, two and five years, by age, gender and primary diagnosis

Table A.5.30 - 58

One-, two- and five-year survival probabilities (cohort 1992-1996): First graft (living donor), adjusted
from day of transplant to one, two and five years, adjusted for age, gender and primary diagnosis

Table A.5.31 - 59

One- and two-year survival probabilities (cohort 1995-1999): First graft (living donor), unadjusted
from day of transplant to one and two years, by age, gender and primary diagnosis

Table A.5.32 - 59

One- and two-year survival probabilities (cohort 1995-1999): First graft (living donor), adjusted
from day of transplant to one and two years, adjusted for age, gender and primary diagnosis

Renal transplants, number and percentage
by donor type

I Introduction

This is the second year in which the Amsterdam based ERA-EDTA Registry has published an annual report. Section A of this report includes tables with 2001 data based on the analyses of data sets received from national and regional registries collecting individual patient data that are included in the ERA-EDTA Registry database. These data are published after receipt of the data sets and subsequent analysis by the Registry office and the following permission for publication from the country involved.

Section B relates to the countries collecting individual patient data, centre questionnaire data or information from health authorities. Their data are not included in the ERA-EDTA Registry database. These countries complete the tables themselves and return them to the ERA-EDTA Registry office for inclusion in this annual report.

II Methods

Section A

The tables in this section are based on the analyses of data sets received from national and regional registries collecting individual patient data, which are included in the ERA-EDTA Registry database.

The databases serving as a basis for the analyses were received on the dates shown in the following table.

Registry	Date
Austria	19 June 2002
Belgium – Dutch-speaking	6 January 2003
Belgium – French-speaking	28 April 2003
Denmark	6 January 2003
Finland	19 December 2002
Greece	6 February 2003
Iceland	3 April 2003
Norway	3 February 2003
Spain – Basque country	19 March 2003
Spain – Catalonia	17 October 2002
Spain – Valencia	10 September 2002
Sweden	8 July 2002
The Netherlands	25 March 2003
United Kingdom - England/Wales	28 March 2003
United Kingdom - Scotland	3 April 2003

Registry data are subject to continuous alteration and improvement. Small differences between ERA-EDTA Registry data and the data presented in the national/regional registry's own annual reports may therefore result from different times of data extraction.

Differences in data collection between collaborating registries and inclusion of their data into the ERA-EDTA Registry database

In the comparison of data between registries it should be recognised that there may be small differences between registries in definitions and in the collection of their data. The different registries do not for example collect data at the same level of detail, especially with regard to the different subtypes of the treatment modalities. Also, registries may handle temporary changes in the treatment modality of the individual patient differently.

The data from England/Wales (United Kingdom) exclude patients younger than 18 years of age in the data sets provided to the ERA-EDTA Registry. Inclusion of those would add 2 pmp to the overall UK incidence rate and 12 pmp to the UK prevalence. In addition, it should be noted that the prevalence figures produced by the UK Renal Registry are slightly higher than those produced by the ERA-EDTA Registry. This is due to the fact that the UK Renal Registry calculates prevalence rates from the electronic quarterly data returns (which are not part of the ERA-EDTA Registry data set) rather than from the timeline which can be incomplete for some patients.

Incidence and prevalence

The incidence tables refer to all patients who started RRT for ESRD in 2001 and the prevalence tables to all patients who were alive and on RRT on 31 December 2001. General population data for the year 2001, provided by Eurostat, the national bureaus of statistics or the national or regional registry, served as the population base.

The grouping of renal diseases is provided in Appendix 1.

For the adjustment of incidence and prevalence for age and gender we used the age and gender distribution of the European population of 1995 as provided by Eurostat.

Survival analysis

For the analysis of survival data we used two five-year cohorts:

- 1992-1996 - for the presentation of 90-day (for survival on RRT and on dialysis), one-, two- and five-year survival probabilities. These analyses were based on data from Austria, Basque Country (Spain), Catalonia (Spain), Denmark, Dutch-speaking Belgium, Finland, French-speaking Belgium, Greece, Iceland, Norway, Scotland (United Kingdom), Sweden, The Netherlands and Valencia (Spain).
- 1995-1999 - for the presentation of 90-day (for survival on RRT and on dialysis), one- and two-year survival probabilities. These analyses were based on data from Austria, Basque Country (Spain), Catalonia (Spain), Denmark, Dutch-speaking Belgium, England/Wales (United Kingdom), Finland, French-speaking Belgium, Greece, Iceland, Norway, Scotland (United Kingdom), Sweden, The Netherlands and Valencia (Spain).

With regard to the inclusion of data, some further comments need to be made. The data were used from the date from which they were available, which in a small number of cases was later than the first cohort year, this being due to the fact that the national or regional registry was established later. Survival was analysed from day 1 and from day 91 onwards for those patients alive and on RRT on those days. All patients had the opportunity to complete the entire follow-up period with the exception of patients starting in the last 90 days of a cohort in a survival analysis from day 91.

For the different types of survival analysis we defined the following events and censoring.

<i>Survival type</i>	<i>Event</i>	<i>Censoring</i>
Patients on renal replacement therapy	Death of patient	Recovery of renal function Loss to follow-up End of follow-up time
Patients on dialysis	Death of patient	Transplantation Recovery of renal function Loss to follow-up End of follow-up time
First transplant recipients	Death of patient	Loss to follow-up End of follow-up time
First graft	Death of patient Graft failure	Loss to follow-up End of follow-up time

As the ERA-EDTA Registry database is still growing with respect to the coverage of European countries, we chose to adjust for fixed parameters in our survival analyses. The values for adjustment are shown in the following table.

<i>Survival type</i>	<i>Age</i>	<i>Gender</i>	<i>Renal disease</i>
Patients on renal replacement therapy	60 years	60% male	DM - non DM 20/80
Patients on dialysis	60 years	60% male	DM - non DM 20/80
First transplant recipients (cadaver donor)	45 years	60% male	DM - non DM 10/90
First transplant recipients (living donor)	45 years	60% male	DM - non DM 10/90
First graft (cadaver donor)	45 years	60% male	DM - non DM 10/90
First graft (living donor)	45 years	60% male	DM - non DM 10/90

In unadjusted survival analysis the cells in the tables were left blank when there were less than 30 patients in that cell. In the adjusted survival analysis, cells with less than 30 events were left empty. The latter analysis excluded patients for whom age, gender, or primary renal disease was missing.

Section B

These tables relate to countries collecting individual patient data, centre questionnaire data or information from health authorities. Their data are not included in the ERA-EDTA Registry database. The tables were completed by national and regional registries and sent to the ERA-EDTA Registry for inclusion in this annual report.

The incidence tables refer to all patients who started RRT for ESRD in 2001 and the prevalence tables to all patients who were alive and on RRT on 31 December 2001. General population data for the year 2001 were provided by the national or regional registries. For the adjustment of incidence and prevalence for age and gender they used the age and gender distribution of the European population of 1995.

Appendix 1 - Grouping of renal diseases

Primary Renal Disease (PRD)	1994 code	1995 code	PRD Group
Glomerulonephritis; histologically NOT examined	10	10	I
Focal segmental glomerulosclerosis with nephrotic syndrome in children	11	11	I
IgA nephropathy (proven by immunofluorescence, not code 76 and not 85)	12	12	I
Dense deposit disease; membrano-proliferative GN; type II (proven by immunofluorescence and/or electron microscopy)	13	13	I
Membranous nephropathy	14	14	I
Membrano-proliferative GN; type I (proven by immunofluorescence and/or electron microscopy - not code 84 or 89)	15	15	I
Crescentic (extracapillary) glomerulonephritis (type I, II, III)	16	16	I
Focal segmental glomerulosclerosis with nephrotic syndrome in adults	17	17	I
Glomerulonephritis; histologically examined, not given above	19	19	I
Pyelonephritis – cause not specified	20	20	II
Pyelonephritis associated with neurogenic bladder	21	21	II
Pyelonephritis due to congenital obstructive uropathy with/without vesico-ureteric reflux	22	22	II
Pyelonephritis due to acquired obstructive uropathy	23	23	II

Primary Renal Disease (PRD)	1994 code	1995 code	PRD Group
Pyelonephritis due to vesico-ureteric reflux without obstruction	24	24	II
Pyelonephritis due to urolithiasis	25	25	II
Pyelonephritis due to other cause	29	29	II
Interstitial nephritis (not pyelonephritis) due to other cause, or unspecified (not mentioned above)	30	30	VII
Nephropathy (interstitial) due to analgesic drugs	31	31	VII
Nephropathy (interstitial) due to cis-platinum	32	32	VII
Nephropathy (interstitial) due to cyclosporin A	33	33	VII
Lead induced nephropathy (interstitial)		34	VII
Drug induced nephropathy (interstitial) not mentioned above	39	39	VII
Cystic kidney disease - type unspecified	40	40	VII
Polycystic kidneys; adult type (dominant)	41	41	III
Polycystic kidneys; infantile (recessive)	42	42	VII
Medullary cystic disease; including nephronophthisis	43	43	VII
Cystic kidney disease - other specified type	49	49	VII
Hereditary/Familial nephropathy - type unspecified	50	50	VII
Hereditary nephritis with nerve deafness (Alport's Syndrome)	51	51	VII
Cystinosis	52	52	VII
Primary oxalosis	53	53	VII
Fabry's disease	54	54	VII
Hereditary nephropathy - other specified type	59	59	VII
Renal hypoplasia (congenital) - type unspecified	60	60	VII
Oligomeganephronic hypoplasia	61	61	VII
Congenital renal dysplasia with or without urinary tract malformation	63	63	VII
Syndrome of agenesis of abdominal muscles (Prune Belly)	66	66	VII
Renal vascular disease - type unspecified	70	70	V
Renal vascular disease due to malignant hypertension	71	71	IV
Renal vascular disease due to hypertension	72	72	IV
Renal vascular disease due to polyarteritis	73	73	VII
Wegener's granulomatosis	74	74	VII
Glomerulonephritis related to liver cirrhosis	76	76	VII
Cryoglobulinaemic glomerulonephritis		78	VII
Renal vascular disease - due to other cause (not given above and not code 84-88)	79	79	V
Diabetes glomerulosclerosis or diabetic nephropathy - Type I	80	80	VI
Diabetes glomerulosclerosis or diabetic nephropathy - Type II	81	80	VI
Myelomatosis/light chain deposit disease	82	82	VII
Amyloid	83	83	VII
Lupus erythematosus	84	84	VII
Henoeh-Schoenlein purpura	85	85	VII
Goodpasture's Syndrome	86	86	VII
Systemic sclerosis (scleroderma)	87	87	VII
Haemolytic Uraemic Syndrome (including Moschcowitz Syndrome)	88	88	VII
Multi-system disease - other (not mentioned above)	89	89	VII
Tubular necrosis (irreversible) or cortical necrosis (different from 88)	90	90	VII
Tuberculosis	91	91	VII
Gout	92	92	VII
Nephrocalcinosis and hypercalcaemic nephropathy	93	93	VII
Balkan nephropathy	94	94	VII
Kidney tumour	95	95	VII
Traumatic or surgical loss of kidney	96	96	VII
Other identified renal disorders	99	99	VII
Chronic renal failure; aetiology uncertain	00	00	VIII

I Glomerulonephritis/sclerosis; II Pyelonephritis; III Polycystic kidneys, adult type; IV Hypertension ;V Renal vascular disease; VI Diabetes mellitus; VII Miscellaneous; VIII Unknown
