ERA-EDTA Registry Committee

F Locatelli, Italy (ERA-EDTA President)

C Zoccali, Italy (Chairman)
C Wanner, Germany (Newsletter Editor)
G Colasanti, Italy
F García López, Spain
AJ van der Heijden, The Netherlands
R Kramar, Austria
T Leivestad, Norway
A MacLeod, Scotland
B Stengel, France
J Tizard, United Kingdom

Registry Office Staff

AM van den Broek, data manager - software engineer
R Cornet, senior medical informatician
FW Dekker, senior epidemiologist
PCW van Dijk, medical informatician
EF Guggenheim-van der Hout, secretary
KJ Jager, managing director - epidemiologist
VS Stel, epidemiologist

Acknowledgements

The ERA-EDTA Registry would like to thank the patients and staff of all the dialysis and transplant units who have contributed data via their national and regional renal registries. In addition, we would like to thank the following persons for their contribution to the work of the ERA-EDTA Registry.

Registry

For contribution to Section A

Austria	R Kramar and HK Stummvoll
Belgium, Dutch-speaking	H Augustijn, JM Billiouw and J De Meester
Belgium, French-speaking	F Collart
Denmark	H Løkkegaard
Finland	C Grönhagen-Riska and P Finne
Greece	GA Ioannidis
Iceland	P Ásmundsson
Italy (13 of 20 regions)	F Conte and M Salomone
Norway	T Leivestad
Spain, Asturias	E Martín Martínez and R Alonso de la Torre
Spain, Basque country	A Magaz, J Aranzabal and I Lampreabe
Spain, Cantabria	M Arias Rodríguez
Spain, Castile and Leon	C Estébanez Álvarez and M Lara Calvo
Spain, Castile-La Mancha	I Moreno Alía, T Sierra Yébenes and G Gutiérrez Ávila
Spain, Catalonia	M Clèries and E Vela
Spain, Valencian region	O Zurriaga and MJ García Blasco
Sweden	S Schön
The Netherlands	F de Charro
United Kingdom, England/Wales	D Ansell and T Feest
United Kingdom, Scotland	K Simpson

For contribution to Section B

Bosnia-Herzegovina	H Resić and E Mešić
Bulgaria	V Ikonomov
Croatia	S Čala
Czech Republic	F Lopot and J Lachmanova
Estonia	M Ots, K Lilenthal and M Luman
France (7 of 24 regions)	C Couchoud and C Lelong-Allonier
France, Auvergne	C Dabot
France, Bretagne	V Joyeux
France, Champagne-Ardenne	H Maheut and F Vitry
France, Languedoc-Roussillon	F de Cornellissen and Y Duny
France, Limousin	JC Aldigier and F Glaudet
France, Lorraine	L Frimat and C Loos
France, Rhône-Alpes	M Labeeuw and AM Schott
FYR of Macedonia	O Stojceva-Taneva, K Zafirovska and G Selim
Germany	HJ Schober-Halstenberg and K Haas
Hungary	J Járay and M Hidvegi
Italy	F Conte and M Salomone
Poland	B Rutkowski and M Lao
Portugal	J Pinto dos Santos
Russia	N Tomilina and B Bikbov
Serbia and Montenegro	M Radovic
Spain (14 of 19 regions)	F García López and R Saracho
Tunisia	N Cherni and H Trimech
Turkey	K Serdengeçti and G Süleymanlar

The ERA-EDTA Registry is funded by the European Renal Association - European Dialysis and Transplant Association (ERA-EDTA). The following companies have committed funds in the form of unrestricted educational grants to assist the ERA-EDTA in the financial support of the Registry: Amgen, Baxter, Fresenius Medical Care, Gambro, Hoffman-La Roche, Hospal, Ortho-BioTech and Shire.

A5 SURVIVAL PROBABILITY (residents only)	
Patient Survival on Renal Replacement Therapy (RRT)	
Table A.5.1	48
90-day, one-, two- and five-year survival probabilities (cohort 1994-1998): Incident RRT patients, unadjusted <i>from day 1 to 90 days, one, two and five years, by age, gender and primary diagnosis</i>	
Table A.5.2	49
90-day, one-, two- and five-year survival probabilities (cohort 1994-1998): Incident RRT patients, adjusted <i>from day 1 to 90 days, one, two and five years, adjusted for age, gender and primary diagnosis</i>	
Table A.5.3	50
One-, two- and five-year survival probabilities (cohort 1994-1998): Incident RRT patients, unadjusted <i>from day 91 to one, two and five years + 90 days, by age, gender and primary diagnosis</i>	
Table A.5.4	51
One-, two- and five-year survival probabilities (cohort 1994-1998): Incident RRT patients, adjusted <i>from day 91 to one, two and five years + 90 days, adjusted for age, gender and primary diagnosis</i>	
Table A.5.5	52
90-day, one- and two-year survival probabilities (cohort 1997-2001): Incident RRT patients, unadjusted <i>from day 1 to 90 days, one and two years, by age, gender and primary diagnosis</i>	
Table A.5.6	53
90-day, one- and two-year survival probabilities (cohort 1997-2001): Incident RRT patients, adjusted <i>from day 1 to 90 days, one and two years, adjusted for age, gender and primary diagnosis</i>	
Table A.5.7	54
One- and two-year survival probabilities (cohort 1997-2001): Incident RRT patients, unadjusted <i>from day 91 to one and two years + 90 days, by age, gender and primary diagnosis</i>	

Table A.5.8	55
One- and two-year survival probabilities (cohort 1997-2001): Incident RRT patients, adjusted from day 91 to one and two years + 90 days, <i>adjusted for age, gender and primary diagnosis</i>	
Patient Survival on Dialysis	
Table A.5.9	56
90-day, one-, two- and five-year survival probabilities (cohort 1994-1998): Incident dialysis patients, unadjusted from day 1 to 90 days, <i>one, two and five years, by age, gender and primary diagnosis</i>	
Table A.5.10	57
90-day, one-, two- and five-year survival probabilities (cohort 1994-1998): Incident dialysis patients, adjusted from day 1 to 90 days, <i>one, two and five years, adjusted for age, gender and primary diagnosis</i>	
Table A.5.11	58
One-, two- and five-year survival probabilities (cohort 1994-1998): Incident dialysis patients, unadjusted from day 91 to one, two and five years + 90 days, <i>by age, gender and primary diagnosis</i>	
Table A.5.12	59
One-, two- and five-year survival probabilities (cohort 1994-1998): Incident dialysis patients, adjusted from day 91 to one, two and five years + 90 days, <i>adjusted for age, gender and primary diagnosis</i>	
Table A.5.13	60
90-day, one- and two-year survival probabilities (cohort 1997-2001): Incident dialysis patients, unadjusted from day 1 to 90 days, <i>one and two years, by age, gender and primary diagnosis</i>	
Table A.5.14	61
90-day, one- and two-year survival probabilities (cohort 1997-2001): Incident dialysis patients, adjusted from day 1 to 90 days, <i>one and two years, adjusted for age, gender and primary diagnosis</i>	
Table A.5.15	62
One- and two-year survival probabilities (cohort 1997-2001): Incident dialysis patients, unadjusted from day 91 to one and two years + 90 days, <i>by age, gender and primary diagnosis</i>	
Table A.5.16	63
One- and two-year survival probabilities (cohort 1997-2001): Incident dialysis patients, adjusted from day 91 to one and two years + 90 days, <i>adjusted for age, gender and primary diagnosis</i>	
Patient Survival after First Transplant (cadaver donor)	
Table A.5.17	64
One-, two- and five-year survival probabilities (cohort 1994-1998): First transplant patients (cadaver donor), unadjusted from day of transplant to one, two and five years, <i>by age, gender and primary diagnosis</i>	
Table A.5.18	65
One-, two- and five-year survival probabilities (cohort 1993-1997): First transplant patients (cadaver donor), adjusted from day of transplant to one, two and five years, <i>adjusted for age, gender and primary diagnosis</i>	
Table A.5.19	66
One- and two-year survival probabilities (cohort 1997-2001): First transplant patients (cadaver donor), unadjusted from day of transplant to one and two years, <i>by age, gender and primary diagnosis</i>	
Table A.5.20	67
One- and two-year survival probabilities (cohort 1997-2001): First transplant patients (cadaver donor), adjusted from day of transplant to one and two years, <i>adjusted for age, gender and primary diagnosis</i>	
Patient Survival after First Transplant (living donor)	
Table A.5.21	68
One-, two- and five-year survival probabilities (cohort 1994-1998): First transplant patients (living donor), unadjusted from day of transplant to one, two and five years, <i>by age, gender and primary diagnosis</i>	
Table A.5.22	69
One-, two- and five-year survival probabilities (cohort 1994-1998): First transplant patients (living donor), adjusted from day of transplant to one, two and five years, <i>adjusted for age, gender and primary diagnosis</i>	
Table A.5.23	70
One- and two-year survival probabilities (cohort 1997-2001): First transplant patients (living donor), unadjusted from day of transplant to one and two years, <i>by age, gender and primary diagnosis</i>	
Table A.5.24	71
One- and two-year survival probabilities (cohort 1997-2001): First transplant patients (living donor), adjusted from day of transplant to one and two years, <i>adjusted for age, gender and primary diagnosis</i>	
Graft Survival after First Transplant (cadaver donor)	
Table A.5.25	72
One-, two- and five-year survival probabilities (cohort 1994-1998): First graft (cadaver donor), unadjusted from day of transplant to one, two and five years, <i>by age, gender and primary diagnosis</i>	
Table A.5.26	73
One-, two- and five-year survival probabilities (cohort 1994-1998): First graft (cadaver donor), adjusted from day of transplant to one, two and five years, <i>adjusted for age, gender and primary diagnosis</i>	
Table A.5.27	74
One- and two-year survival probabilities (cohort 1997-2001): First graft (cadaver donor), unadjusted from day of transplant to one and two years, <i>by age, gender and primary diagnosis</i>	

Table A.5.28	75
One- and two-year survival probabilities (cohort 1997-2001): First graft (cadaver donor), adjusted from day of transplant to one and two years, <i>adjusted for age, gender and primary diagnosis</i>	
Graft Survival after First Transplant (living donor)	
Table A.5.29	76
One-, two- and five-year survival probabilities (cohort 1994-1998): First graft (living donor), unadjusted from day of transplant to one, two and five years, <i>by age, gender and primary diagnosis</i>	
Table A.5.30	77
One-, two- and five-year survival probabilities (cohort 1994-1998): First graft (living donor), adjusted from day of transplant to one, two and five years, <i>adjusted for age, gender and primary diagnosis</i>	
Table A.5.31	78
One- and two-year survival probabilities (cohort 1997-2001): First graft (living donor), unadjusted from day of transplant to one and two years, <i>by age, gender and primary diagnosis</i>	
Table A.5.32	79
One- and two-year survival probabilities (cohort 1997-2001): First graft (living donor), adjusted from day of transplant to one and two years, <i>adjusted for age, gender and primary diagnosis</i>	

Patient Survival by Modality and Primary Diagnosis

Figure A.5.1	80
Adjusted survival (cohort 1994-1998): Incident dialysis patients and patients receiving a first transplant in the calendar year from day 91, <i>by modality, adjusted for age, gender and primary diagnosis</i>	
Figure A.5.2	80
Adjusted survival (cohort 1994-1998): Incident haemodialysis patients from day 91, <i>by primary diagnosis, adjusted for age and gender</i>

I Introduction

The ERA-EDTA Registry collects data on renal replacement therapy (RRT) via the national and regional renal registries in Europe.

This 2003 annual report includes information based on 55 registries from 27 countries. Section A contains data on incidence and prevalence from 32 national and regional registries from 12 countries whose individual patient data are included in the ERA-EDTA Registry database (shown in red) as well as data on patient survival, graft survival and expected remaining lifetimes.

Section B relates to 24 national and regional registries from 17 countries providing aggregated data based on individual patient data, centre questionnaire data or information from health authorities (shown in orange). Their data are not included in the ERA-EDTA Registry database. These registries complete the tables themselves and return them to the ERA-EDTA Registry office for inclusion in this annual report.

II Methods

Section A

The tables in this section are based on the analyses of data sets received from national and regional registries collecting individual patient data, which are included in the ERA-EDTA Registry database. Like in 2002, it was not possible for French-speaking Belgium to participate in this report with recent data as they had technical problems at the start of a new web-based computer system. This year the Italian national registry covered 62% of the total population with individual patient data. However, the data of the regions Apulia and Lazio did not fit with the structure of the ERA-EDTA registry database. Therefore, data presented on Italy in this report cover 45% of the total Italian population and are based on 13 of 20 regions, including Abruzzi, Basilicata, Calabria, Emilia-Romagna, Liguria, Marche, Molise, Piedmont, Sardinia, Trentino-Alto Adige, Tuscany, Valle d'Aosta and Veneto.

The databases serving as a basis for the analyses were received on the dates shown in the following table.

Registry	Date
Austria	15 November 2004
Belgium, Dutch-speaking	15 December 2004
Belgium, French-speaking	28 April 2003
Denmark	20 November 2004
Finland	14 January 2005
Greece	15 February 2005
Iceland	22 November 2004
Italy (13 of 20 regions)	4 February 2005
Norway	1 November 2004
Spain, Asturias	18 February 2005
Spain, Basque country	10 March 2005
Spain, Cantabria	14 January 2005
Spain, Castile and Leon	25 February 2005
Spain, Castile-La Mancha	14 January 2005
Spain, Catalonia	5 November 2004
Spain, Valencian region	11 November 2004
Sweden	21 January 2005
The Netherlands	11 November 2004
United Kingdom, England/Wales	4 April 2005
United Kingdom, Scotland	14 February 2005

Registry data are subject to continuous alteration and improvement. Small differences between ERA-EDTA Registry data and the data presented in the national/regional registry's own annual reports may therefore result from different times of data extraction.

Differences in data collection between collaborating registries and inclusion of their data into the ERA-EDTA Registry database

In the comparison of data between registries it should be recognized that there may be small differences between registries in definitions and in the collection of their data. The different registries do not for example collect data at the same level of detail, especially with regard to the different subtypes of the treatment modalities. If registries provide information on the residency of their patients, only data on residents in the coverage area of such registries are included into the ERA-EDTA Registry database.

The data present from Belgium (Dutch-speaking), Spain (Asturias), Spain (Cantabria), Spain (Castile and Leon), Spain (Castile-La Mancha), and the United Kingdom (England/Wales) comprise only patients older than 20 years of age. In the UK, inclusion of data on children would add 2 pmp to the overall UK incidence rate and 12 pmp to the UK prevalence. In addition, it should be noted that the prevalence figures produced by the UK Renal Registry are slightly higher than those produced by the ERA-EDTA Registry. This is due to the fact that the UK Renal Registry calculates prevalence rates from the electronic quarterly data returns (which are not part of the ERA-EDTA Registry data set) rather than from the timeline which can be incomplete for some patients.

Incidence and prevalence

The incidence tables refer to all patients who started RRT for end stage renal disease (ESRD) in 2003 and the prevalence tables to all patients who were alive and on RRT on 31 December 2003. General population data for the year 2003, provided by Eurostat, the national bureaus of statistics or the national or regional registry, served as the population base. The grouping of renal diseases is provided in Appendix 1.

For the adjustment of incidence and prevalence for age and gender we used the age and gender distribution of the European population of 1995 as provided by Eurostat.

Survival analysis

For the analysis of survival data we used two five-year cohorts:

- 1994-1998 - for the presentation of 90-day (for survival on RRT and on dialysis), one-, two- and five-year survival probabilities. These analyses were based on data from Austria, Belgium (Dutch-speaking), Belgium (French-speaking), Denmark, Finland, Greece, Iceland, Italy (Basilicata), Italy (Calabria), Italy (Emilia-Romagna), Italy (Marche), Italy (Piedmont), Italy (Sardinia), Italy (Veneto), Norway, Spain (Basque country), Spain (Cantabria), Spain (Catalonia), Spain (Valencian region), Sweden, The Netherlands, United Kingdom (England/Wales) and United Kingdom (Scotland).
- 1997-2001 - for the presentation of 90-day (for survival on RRT and on dialysis), one- and two-year survival probabilities. These analyses were based on data from Austria, Belgium (Dutch-speaking), Belgium (French-speaking), Denmark, Finland, Greece, Iceland, Italy (Basilicata), Italy (Calabria), Italy (Emilia-Romagna), Italy (Marche), Italy (Piedmont), Italy (Sardinia), Italy (Veneto), Norway, Spain (Basque country), Spain (Cantabria), Spain (Catalonia), Spain (Valencian region), Sweden, The Netherlands, United Kingdom (England/Wales) and United Kingdom (Scotland).

With regard to the inclusion of data, some further comments need to be made. The data were used from the date from which they were available, which in a small number of cases was later than the first cohort year, this being due to the fact that the national or regional registry was established later. Survival was analysed from day 1 and from day 91 onwards for those patients alive and on RRT on those days. All patients had the opportunity to complete the entire follow-up period with the exception of patients starting in the last 90 days of a cohort in a survival analysis from day 91.

For the different types of survival analysis we defined the following events and censoring.

Survival type	Event	Censoring
Patients on renal replacement therapy	Death of patient	Recovery of renal function Loss to follow-up End of follow-up time
Patients on dialysis	Death of patient	Transplantation Recovery of renal function Loss to follow-up End of follow-up time
First transplant recipients	Death of patient	Loss to follow-up End of follow-up time
First graft	Death of patient Graft failure	Loss to follow-up End of follow-up time

Survival is presented in tables and figures. As the ERA-EDTA Registry database is still growing with respect to the coverage of European countries, we chose to adjust for fixed values for a number of parameters in our survival analyses. The values used for the survival tables are shown in the following table.

Survival type	Age	Gender	Renal disease
Patients on renal replacement therapy	60 years	60% male	20% diabetes mellitus 17% hypertension/rvd * 15% glomerulonephritis 48% other cause
Patients on dialysis	60 years	60% male	20% diabetes mellitus 17% hypertension/rvd 15% glomerulonephritis 48% other cause
First transplant recipients (cadaver donor)	45 years	60% male	10% diabetes mellitus 8% hypertension/rvd 28% glomerulonephritis 54% other cause
First transplant recipients (living donor)	45 years	60% male	10% diabetes mellitus 8% hypertension/rvd 28% glomerulonephritis 54% other cause
First graft (cadaver donor)	45 years	60% male	10% diabetes mellitus 8% hypertension/rvd 28% glomerulonephritis 54% other cause
First graft (living donor)	45 years	60% male	10% diabetes mellitus 8% hypertension/rvd 28% glomerulonephritis 54% other cause

* rvd: renal vascular disease

In unadjusted survival analysis the cells in the tables were left blank when there were less than 30 patients in that cell. In the adjusted survival analysis, cells with less than 30 events were left empty. The latter analysis excluded patients for whom age, gender, or primary renal disease was missing.

In the Figures A.5.1 to A.5.3 survival was adjusted for age 60 years and gender 60% male. In addition, Figure A.5.1 was adjusted for renal disease distribution: 20% diabetes mellitus; 17% hypertension/renal vascular disease (rvd); 15% glomerulonephritis and 48% other cause.

For the calculation of expected remaining lifetimes of the patients and the general population we used the same methodology as the USRDS (USRDS 2004 Annual Report). For Europe, the mortality data of the general population of the contributing countries were provided by Eurostat. The size of the contribution of each country to the general population that was used to calculate expected remaining lifetimes was in proportion to the size of the general population covered by its registry.

Section B

These tables relate to countries which provide aggregated data based on individual patient data, centre questionnaire data or information from health authorities. As their data are not included in the ERA-EDTA Registry database, the tables were completed by national and regional registries themselves and sent to the ERA-EDTA Registry for inclusion in this annual report. Data from France are based on 7 of 24 regions, including Auvergne, Bretagne, Champagne-Ardenne, Languedoc-Roussillon, Limousin, Lorraine, and Rhône-Alpes, whereas the data of Spain are based on 14 of 19 regions, including Andalusia, Asturias, Basque country, Canary Islands, Cantabria, Castile and Leon, Castile-La Mancha, Extremadura, Galicia, La Rioja, Navarra, Valencian region, and on the two overseas cities Ceuta and Melilla.

The incidence tables refer to all patients who started RRT for ESRD in 2003 and the prevalence tables to all patients who were alive and on RRT on 31 December 2003. General population data for the year 2003 were provided by the national or regional registries. For the adjustment of incidence and prevalence for age and gender they used the age and gender distribution of the European population of 1995.

For the French data it was assumed that patients with a functioning graft with unknown residence lived in the same region where they were followed.

Appendix 1 - Grouping of renal diseases

Primary Renal Disease (PRD)	1994 code	1995 code	PRD Group
Glomerulonephritis; histologically NOT examined	10	10	I
Focal segmental glomerulosclerosis with nephrotic syndrome in children	11	11	I
IgA nephropathy (proven by immunofluorescence, not code 76 and not 85)	12	12	I
Dense deposit disease; membrano-proliferative GN; type II (proven by immunofluorescence and/or electron microscopy)	13	13	I
Membranous nephropathy	14	14	I
Membrano-proliferative GN; type I (proven by immunofluorescence and/or electron microscopy - not code 84 or 89)	15	15	I
Crescentic (extracapillary) glomerulonephritis (type I, II, III)	16	16	I
Focal segmental glomerulosclerosis with nephrotic syndrome in adults	17	17	I
Glomerulonephritis; histologically examined, not given above	19	19	I
Pyelonephritis – cause not specified	20	20	II
Pyelonephritis associated with neurogenic bladder	21	21	II
Pyelonephritis due to congenital obstructive uropathy with/without vesico-ureteric reflux	22	22	II
Pyelonephritis due to acquired obstructive uropathy	23	23	II
Pyelonephritis due to vesico-ureteric reflux without obstruction	24	24	II
Pyelonephritis due to urolithiasis	25	25	II
Pyelonephritis due to other cause	29	29	II
Interstitial nephritis (not pyelonephritis) due to other cause, or unspecified (not mentioned above)	30	30	VII
Nephropathy (interstitial) due to analgesic drugs	31	31	VII
Nephropathy (interstitial) due to cis-platinum	32	32	VII
Nephropathy (interstitial) due to cyclosporin A	33	33	VII
Lead induced nephropathy (interstitial)	34		VII
Drug induced nephropathy (interstitial) not mentioned above	39	39	VII
Cystic kidney disease - type unspecified	40	40	VII
Polycystic kidneys; adult type (dominant)	41	41	III
Polycystic kidneys; infantile (recessive)	42	42	VII
Medullary cystic disease; including nephronophthisis	43	43	VII
Cystic kidney disease - other specified type	49	49	VII
Hereditary/Familial nephropathy - type unspecified	50	50	VII
Hereditary nephritis with nerve deafness (Alport's Syndrome)	51	51	VII
Cystinosis	52	52	VII
Primary oxalosis	53	53	VII
Fabry's disease	54	54	VII
Hereditary nephropathy - other specified type	59	59	VII
Renal hypoplasia (congenital) - type unspecified	60	60	VII
Oligomeganephronic hypoplasia	61	61	VII
Congenital renal dysplasia with or without urinary tract malformation	63	63	VII
Syndrome of agenesis of abdominal muscles (Prune Belly)	66	66	VII
Renal vascular disease - type unspecified	70	70	V
Renal vascular disease due to malignant hypertension	71	71	IV
Renal vascular disease due to hypertension	72	72	IV
Renal vascular disease due to polyarteritis	73	73	VII
Wegener's granulomatosis	74	74	VII
Glomerulonephritis related to liver cirrhosis	76	76	VII
Cryoglobulinaemic glomerulonephritis		78	VII
Renal vascular disease - due to other cause (not given above and not code 84-88)	79	79	V
Diabetes glomerulosclerosis or diabetic nephropathy - Type I	80	80	VI
Diabetes glomerulosclerosis or diabetic nephropathy - Type II	81	80	VI
Myelomatosis/light chain deposit disease	82	82	VII
Amyloid	83	83	VII
Lupus erythematosus	84	84	VII
Henoch-Schoenlein purpura	85	85	VII
Goodpasture's Syndrome	86	86	VII
Systemic sclerosis (scleroderma)	87	87	VII
Haemolytic Uraemic Syndrome (including Moschcowitz Syndrome)	88	88	VII
Multi-system disease - other (not mentioned above)	89	89	VII
Tubular necrosis (irreversible) or cortical necrosis (different from 88)	90	90	VII
Tuberculosis	91	91	VII
Gout	92	92	VII
Nephrocalcinosis and hypercalcaemic nephropathy	93	93	VII
Balkan nephropathy	94	94	VII
Kidney tumour	95	95	VII
Traumatic or surgical loss of kidney	96	96	VII
Other identified renal disorders	99	99	VII
Chronic renal failure; aetiology uncertain	00	00	VIII

I Glomerulonephritis/sclerosis; II Pyelonephritis; III Polycystic kidneys, adult type; IV Hypertension; V Renal vascular disease; VI Diabetes mellitus;
VII Miscellaneous; VIII Unknown

Appendix 2 - Abbreviations

Abbreviation	Term
APD	automated peritoneal dialysis
CAPD	continuous ambulatory peritoneal dialysis
CI	confidence interval
DM	diabetes mellitus
ERA-EDTA	European Renal Association – European Dialysis and Transplant Association
ESRD	end stage renal disease
GN	glomerulonephritis/sclerosis
HD	haemodialysis
HDF	haemodiafiltration
HF	haemofiltration
HT	hypertension
Misc	miscellaneous
N	count
Oth	other
PD	peritoneal dialysis
PKD	polycystic kidneys, adult type
Pmp	per million population
PN	pyelonephritis
PRD	primary renal disease
RRT	renal replacement therapy
RVD	renal vascular disease
SD	standard deviation
Tx	transplant
Unkn	unknown
USRDS	United States Renal Data System
